WHO WILL BUY	This delightfully illustrated book for children aged 7-11 years skillfully combines fact with fiction in a highly imaginative and humorous way. <i>Professor P and the Jurassic Coast</i> tells the exciting story of two children who travel back in time to explore the Jurassic world of the dinosaurs. At the end of the book is an illustrated Fossil Guide full of fun and interesting facts about the most common Jurassic fossils. The book is the first in Davidson's prehistoric time travel trilogy.

An Amazing Adventure in Time!

While collecting fossils on the beach Peter and Tara hear a strange explosion from beyond the cliffs. They investigate and meet Professor P, a scientist and inventor with a house full of amazing inventions! When Professor P disappears in mysterious circumstances, Peter and Tara discover his time machine and with the help of Floppy, his super intelligent supercomputer, they begin searching for him. This is the start of their amazing adventure exploring the Jurassic world of the dinosaurs – one that will change their world *forever!*

**Includes a 16 page illustrated *Fossil Guide*
full of fun and interesting facts.**
